

DISHA GOSWAMI

SOLUTIONS ALCHEMIST | ALIGNING DEEP
ENGINEERING & COLLECTIVE INTELLECT TO
DRIVE STRATEGIC SCALE

CONTACT

- Noida, Uttar Pradesh, India
- +91-9997688877
- dishagoswami85@gmail.com
- linkedin.com/in/dishagoswami85
- github.com/dishagoswami2502

CORE SKILLS

- Industry 4.0 & Smart Manufacturing
- Robotics & Industrial Automation
- Technical Consulting & Solution Delivery
- Client & Stakeholder Management
- PLC Programming & Control Systems
- Industrial IoT & Embedded Systems
- Cross-Functional Program Management
- Technical Demonstrations & Workshops
- Robotics Lab Deployment
- CSR & Strategic Partnerships
- Curriculum Architecture & Technical Training
- Automation Workflow Design
- Team Coordination & Operations Management

TOOLS & PLATFORMS

- C
- C++
- Python
- SQL
- Arduino
- ESP32
- Pixhawk
- Docker
- PLC L20/L25
- Hilscher
- Profibus
- Sensors
- Eagle
- Proteus
- Mission Planner

EDUCATION

- BITS Pilani**
M.Tech, Embedded Engineering (WILP)
Graduated: 2025
- Ajay Kumar Garg Eng. College**
B.Tech, Electrical & Electronics Engineering
Graduated: 2022
- Delhi Public School, Bulandshahr**
Intermediate & High School
2018 | 2016

PROFESSIONAL SUMMARY

From the precision of robotics to the broader scale of industrial innovation, my work is fueled by a drive to build systems that matter. With a background rooted in engineering and a perspective shaped by strategic thinking, I navigate the intersection of technical depth and operational management. I've spent my career turning complex challenges into streamlined, practical results—an evolution that has seen me grow from a technical specialist into a leader of multi-disciplinary programs. Whether coordinating across government sectors or driving corporate initiatives, my focus remains on fostering the synergy between people, technology, and strategy to create lasting impact.

SELECTED ACHIEVEMENTS

- Built and managed strategic CSR and industry collaboration initiatives with organizations including Capgemini and IDEMIA for robotics and Industry 4.0 programs.
- Led technical demonstrations, robotics showcases, and stakeholder engagements for international delegates, corporate leaders, and senior government officials.
- Directed large-scale robotics and automation initiatives across Delhi NCR, overseeing deployment planning, mentor operations, curriculum execution, and program delivery.
- Contributed to the AKGEC Robotics Club's ROBOCON 2020 participation, supporting engineering execution for a nationally recognized Top-20 finish.
- Designed and delivered advanced robotics, automation, PLC, and Industrial IoT learning ecosystems for students, technical teams, and institutional partners.
- Established robotics laboratories and hands-on automation environments integrating embedded systems, industrial sensors, and smart manufacturing concepts.

WORK EXPERIENCE

Regional Manager / Robotics Program Manager Aug 2024 – Present
Noida, Uttar Pradesh, India

THE INNOVATION STORY

- Lead end-to-end execution of robotics, automation, and Industry 4.0 programs across Delhi NCR, ensuring high-quality deployment, operational excellence, and flawless program delivery.
- Manage client-facing engagements involving CSR collaborations, institutional partnerships, technical consultations, and strategic program planning.
- Coordinate robotics lab infrastructure setup, automation workflows, mentor operations, curriculum implementation, and execution management across multiple centers.
- Build end-to-end curriculum frameworks, execution methodologies, and SOP-driven operational processes to ensure scalable, standardized, and seamless program execution.
- Deliver technical walkthroughs, demonstrations, and solution presentations for corporate stakeholders, delegates, and educational leadership teams.
- Drive cross-functional collaboration between technical mentors, operations teams, institutions, and partner organizations to ensure successful and efficient program execution.
- Design customized robotics and automation learning solutions aligned with learner outcomes, institutional requirements, and evolving industry trends.

Electromechanical Specialized Resource Person Apr 2023 – Jul 2024
ASDC Delhi, India

- Delivered advanced robotics and industrial automation training programs for senior secondary learners under DBSE initiatives.
- Supported deployment of practical automation labs focused on embedded systems, industrial sensors, control systems, and Industry 4.0 applications.
- Developed structured technical modules covering PLC concepts, IoT integration, automation workflows, and smart manufacturing fundamentals.
- Facilitated project-based learning initiatives emphasizing real-world engineering problem solving and system integration.

Robotics Engineer Jun 2022 – May 2023
SKYFI LABS Remote

- Conducted robotics and IoT training programs involving Arduino, ESP32, embedded systems, wireless communication, and automation technologies.
- Developed functional prototypes integrating sensors, microcontrollers, and IoT-based communication systems for real-world applications.
- Guided learners through robotics design, embedded system development, and automation project execution using hands-on engineering methodologies.
- Supported technical implementation and troubleshooting across robotics and embedded systems projects.

CERTIFICATIONS

- **KUKA GmbH**
International Certification - Basic & Advanced
- **BOSCH Rexroth**
Certification - Automation Technologies
- **NSIC Certification**
Advanced Industrial Training in Automation

LANGUAGES

- English - Professional proficiency
- Hindi - Native / bilingual proficiency

STRENGTHS

Technical Leadership

Program Ownership

Communication & Presentation

Stakeholder Management

Problem Solving

Team Coordination

INTERESTS

- Outdoor sports
- Running
- Volleyball
- Badminton

WORK EXPERIENCE

Bosch Rexroth Student Ambassador
AKGEC SKILLS

- Represented AKGEC SKILLS at MEGAEXPO 2022 and technical robotics events.
- Worked on PLC programming and KUKA KR16 industrial robot programming, including exposure to servo systems and industrial control workflows.

Oct 2021 - Jun 2022
Ghaziabad, U.P., India

Core Electronics Team Member
AKGEC Robotics Club

- Contributed to electronics design, embedded programming and automation projects for robotics competitions and technical builds.

Aug 2019 - May 2022
Ghaziabad, U.P., India

Electronics Engineer Intern
FIREWIRES

- Developed ESP32-based home automation prototypes using Eagle and Proteus for design and simulation support.
- Contributed to OBD diagnostic modules and industrial sensor integration prototypes for vehicle diagnostics and data collection.

Aug 2021 - Nov 2021
Hyderabad, Telangana, India

KEY PROJECTS

Advanced Robotic Arm Optimization - 3D Array Mapping

- Designed optimized 3D array mapping logic for KUKA KR16 robotic arm palletizing operations, replacing conventional layer-by-layer 2D mapping with a more scalable optimization approach.
- Improved execution logic for industrial palletizing by structuring robot movement, position mapping and placement sequences for more efficient operation.

Industrial Tyre Sorting Automation System

- Developed PLC-based automation logic for tyre sorting with barcode-based identification and routing workflow.
- Built the sequencing logic for industrial implementation, process optimization and repeatable sorting operations.

Industrial IoT & Docker-Based Communication Interface

- Developed a communication interface between PLC and embedded controller using a Hilscher device, Docker-based environment and Profibus protocol.
- Performed firmware-level experimentation and embedded communication testing for industrial IoT integration.

Predictive Maintenance - Motor Lifecycle Analysis

- Worked on a predictive maintenance concept to estimate industrial motor lifecycle, operational efficiency and replacement timing.
- Designed the approach to support maintenance decisions, reduce unnecessary replacement costs and minimize downtime risk.

Collision Avoidance Drone System

- Built an autonomous drone prototype using Pixhawk, Arduino IDE, ultrasonic sensors and servo mechanisms for obstacle detection and automated delivery testing.
- Integrated Mission Planner for automated navigation and destination management.

Instagram User Analytics

- Performed SQL-based analysis of user datasets to identify engagement patterns and generate product-focused insights.
